Token Supply Distribution

Total Supply: 100,000,000 QPT

ID: 0x025D3AD19CC283218aB0C88e7C4DBA2Fd3fC8DA9

Allocation Breakdown:

- 70,000,000 QPT – Public Presale (Hosted on Pinksale/Gempad)
- 25,000,000 QPT – Staking Rewards (Locked in a smart contract with 2%–6% monthly returns)
- 1,000,000 QPT – CEX Listings (Vindax, CoinEx, BankCex, and MEXC)
- 1,000,000 QPT – Quéptigame Investment Fund
- 3,000,000 QPT – Development Team (1M Cédric, 1M Kyle, 1M MM)

Event Chest (QEC) Details:

- Total Supply: 300,000 QEC
- Price per Unit: \$5.00
- 300,000 QEC – Presale 2.0 (Quéptigame Launch, Post-Stake 1.0)

The Birth of QuéptiCoin: freedom and Decentralization

In the hallowed halls of a vibrant university, where curious minds converged in pursuit of knowledge, two extraordinary students found each other - Cédric and Kyle. Bound not just by their shared passion for mathematics, economics, and programming, but by a romance that blossomed amidst lines of code and economic theories

During their academic journey, they were fortunate to encounter an extraordinary professor - Enry Mathews Quépti. A man ahead of his time, a staunch anarcho-capitalist with an unwavering belief in decentralized systems. His lectures transcended mere formulas and algorithms; they were profound discourses on freedom, individual sovereignty, and the fallacy of centralized power that inevitably leads society to dictatorship disguised as democracy.

With his calm yet resolute voice, he would proclaim:

"True reduction of inequality doesn't come from more taxes or state control, but from less intervention, increased competition, and a truly free economy - where power is distributed, not concentrated."

These words resonated deeply with Cédric and Kyle, who already harbored an ardent desire to create something meaningful.

Driven by their technological passion, they founded KrosterInc, a software development and web solutions company. For years, they worked tirelessly, immersed in digital projects and lines of code. Yet with time, they felt a greater calling.

They decided to return to university, this time to specialize in blockchain security. There, they reunited with their former mentor, Professor Quépti, whose ideas about decentralization and cryptocurrencies inspired them like never before.

Recognizing their potential, the professor challenged them:

"Why not create something that unites technology and freedom? Something like Bitcoin, but with an even more audacious proposition - a currency that doesn't just decentralize money, but power structures themselves?"

Thus, with his guidance, Cédric and Kyle began sketching what would eventually become QuéptiCoin. Tragically, Professor Quépti succumbed to cancer, but his legacy endured. In his honor, they named their creation Quépti - immortalizing his vision of a more just and decentralized world.

Today, QuéptiCoin is more than a technological project. It's the realization of three visionaries' dreams:

- Cédric and Kyle, who combined love, mathematics, and code in pursuit of economic freedom
- Professor Enry Mathews Quépti, whose teachings live on in every transaction, every smart contract, and the philosophy guiding the Quépti ecosystem

What Drives Us?

QuéptiCoin carries in its DNA the belief that true change begins with economics. Whether through Quépti Banking (with its decentralized compound interest system) or Quépti Multiverse (where players truly own their assets), our mission is clear:

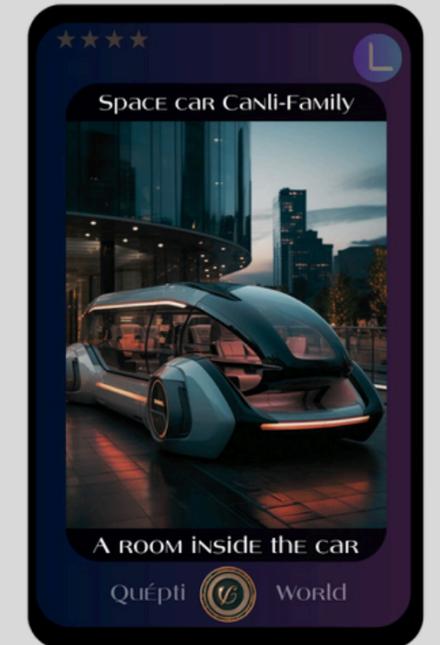

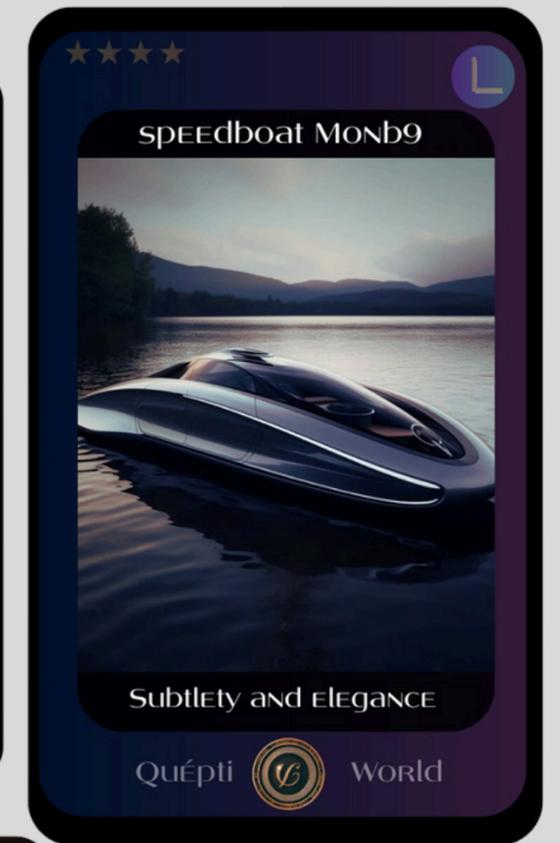

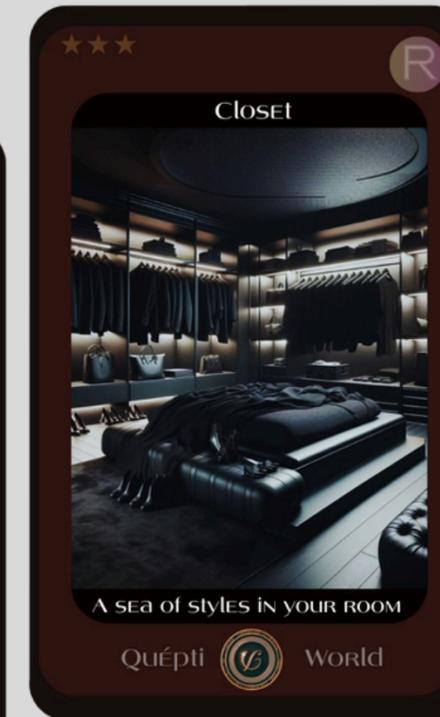

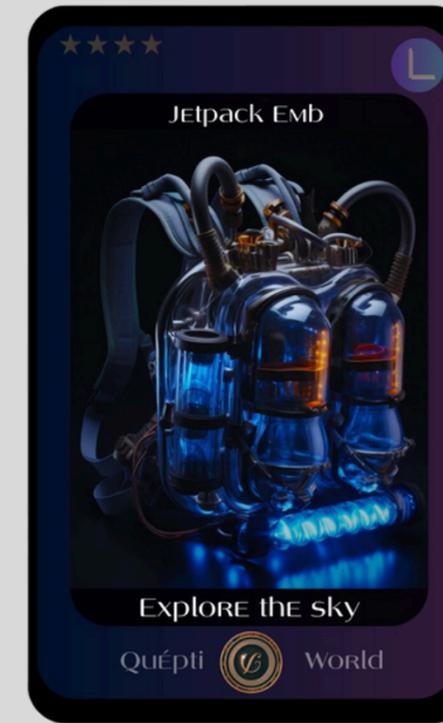

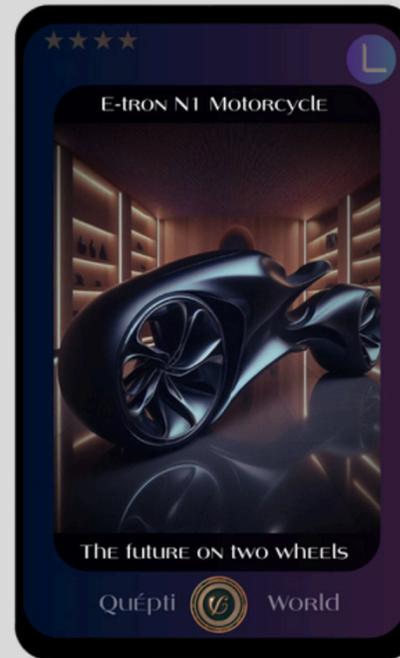

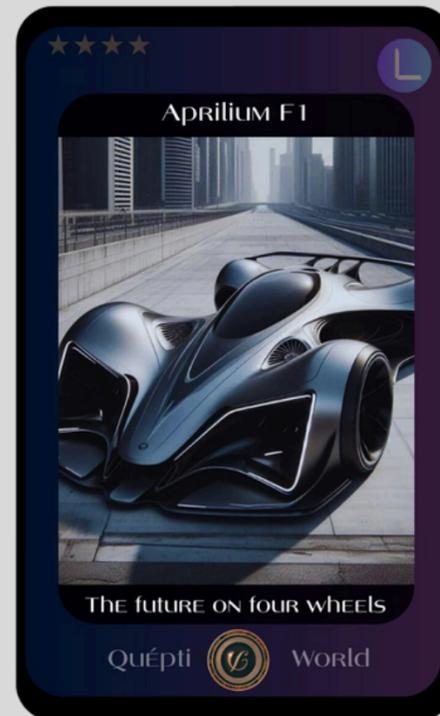

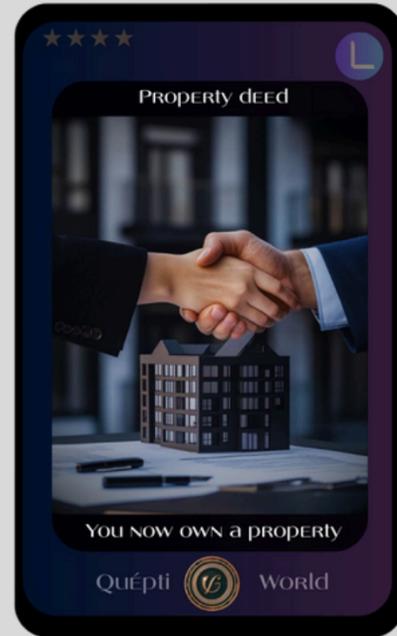

"To decentralize power. To transfer control from the hands of the few to the hands of the many. And in doing so, honor the memory of those who believed a freer world was possible."

QuéptiCoin: More than a cryptocurrency. A legacy of freedom.

QUÉPTICOIN

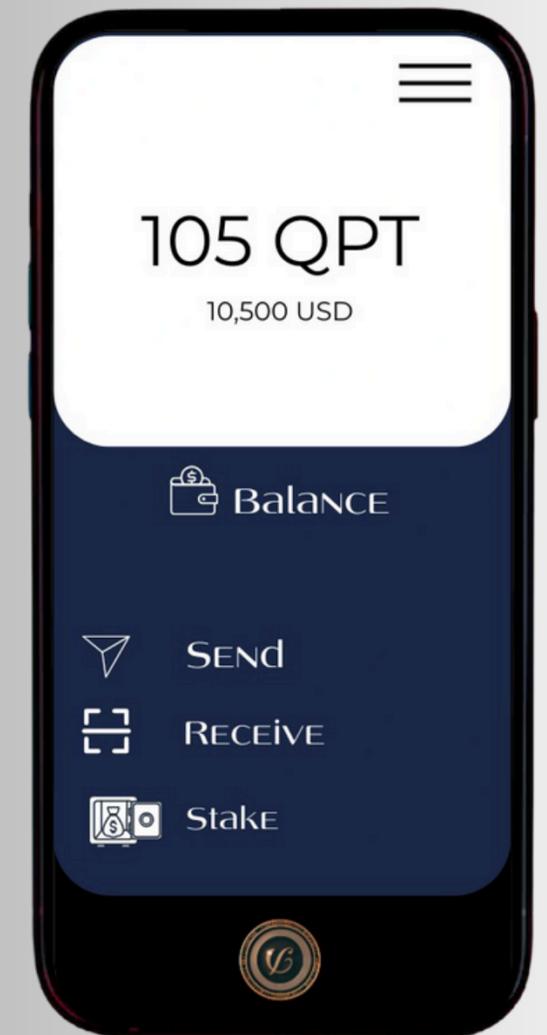

WEALTH FOR ALL

📌 Purpose of QueptiCoin

The Token Powering the Quépti Banking Ecosystem and Quépti Multiverse

QueptiCoin (QPT) is an innovative token designed to sustain and enhance two strategic pillars: Quépti Banking, a decentralized finance (DeFi) system focused on compound interest, and Quépti Multiverse, a gamified social platform inspired by blockbuster hits like The Sims and Pokémon GO, integrating NFT rewards and staking mechanisms.

Our mission is to deliver an immersive and rewarding experience, where users are incentivized not only to participate but also to engage long-term. Through compound interest in Staking 2.0 and a robust decentralized economy, we reward loyalty and active interaction within the ecosystem, creating a virtuous cycle of token appreciation and utility.

1st Segment – Financial Market & Compound Interest

Within Quépti Banking, we are building a secure, audited, and transparent financial ecosystem, designed to provide stability and sustainable profitability for investors.

Fair and Productive Presale with Healthy Deflation

To combat inflation and excessive devaluation, we are launching a presale with a controlled deflationary model, ensuring long-term token stability.

Exclusive Staking with Attractive Returns

In the first phase of the project, presale participants will gain exclusive access to our staking system. After the presale concludes, 25 million tokens will be locked via audited smart contracts, ensuring security and transparency. These tokens will be automatically released through Web3 contract registration.

- Monthly Passive Income: QPT holders will generate recurring revenue through staking, leveraging a compound interest model that maximizes earnings over time.
- Annual Return Potential: The system is designed to offer up to 72% annual dividends, positioning it as one of the most lucrative DeFi opportunities for consistent capital growth.

Staking System

Period	Monthly Income	Total Yield
2 Months	2%	4%
4 Months	3%	12%
6 Months	4%	24%
8 Months	5%	40%
12 Months	6%	72%

2nd Segment – Quépti Multiverse: Gamification & NFT Rewards

Beyond finance, QueptiCoin serves as the primary currency for Quépti Multiverse, blending social interaction, gaming, and digital economics.

- Gamified Experience: Users can explore a virtual universe, interact with other players, collect exclusive NFTs, and complete missions to earn QPT rewards.
- In-Game Staking: Beyond traditional staking, players can lock tokens to enhance their in-game influence, unlocking rare items and competitive advantages.
- Utility-Based NFTs: Every digital asset in Quépti Multiverse holds real-world value, tradable on marketplaces or used to enrich the ecosystem experience.

Conclusion: A Multi-Dimensional Project

QueptiCoin is more than just a token—it's the foundation of an integrated ecosystem merging decentralized finance and digital entertainment. With a well-structured economic model, audited smart contracts, and a unique value proposition, we are redefining the interaction between users, investors, and gamers.

Whether you seek passive income through staking or an immersive metaverse filled with rewards, QueptiCoin is poised to become a leading utility cryptocurrency in the market.

Quiépti Game

DECENTRALIZED world

QuiéptiWorld

A FUTURE DESIGNED FOR THOSE WHO THINK BIG

 EVENT TIMELINE & FUNDRAISING OBJECTIVES

2. Presale Launch – DXSALE

Objective: Bootstrap initial liquidity and decentralize token distribution.

Fundraising Goal: \$1,000,000

Mechanism:

Fixed-price sale with tiered bonuses for early participants. 100% of the funds raised will be allocated to DEX liquidity pools (e.g., PancakeSwap) paired with BNB.

Liquidity locked for 12 months via smart contract.

Success Metrics:

Minimum of 100 holders after the presale to ensure organic market depth.

Listing on CoinMarketCap and CoinGecko within 14 days of liquidity generation.

3. Staking 1.0 Launch

Purpose: Incentivize long-term holding with compound interest.

- Token Allocation: 25,000,000 QPT (locked in audited smart contracts).
- Annual Target APY: Up to 72% (adjusted quarterly based on protocol revenue).
- Vesting: Linear release over 365 days

Technical Assurance:

- CertiK audit completed prior to deployment.
- Real-time APY dashboard accessible to all stakers.

4. CEX Listings & Market Expansion

Purpose: Enhance liquidity, visibility, and institutional adoption.

- Token Allocation: 1,000,000 QPT (reserved for exchange listings).
- Target Exchanges: Tier-2 CEXs (e.g., MEXC, Gate.io) with plans for Tier-1 (KuCoin, Bybit).
- Strategy:
 - 50% of tokens used for market-making (MM bots and liquidity provisioning).
 - 50% allocated to listing fees and promotional campaigns (e.g., trading competitions).

Success Metrics:

- Achieve Top 10 trending status on at least one exchange post-listing.
- Increase daily trading volume to \$500,000+ within 30 days.

5. "Investor's Treasure Chest" NFT Presale Event

Purpose: Fund the QuéptiGame development through exclusive NFT sales.

- NFT Details:
 - Price: \$5.00 per Chest (limited to 300,000 units).
 - Utility: Grants early access to Quépti Multiverse beta, in-game assets, and staking boosts.
- Fundraising Goal: \$1,500,000
 - Allocation Breakdown:
 - Game Development: \$1,000,000 (core gameplay, NFT mechanics, and server infrastructure).
 - Team Compensation: \$200,000
 - Marketing & Airdrops: \$300,000 (community growth and viral campaigns).

Roadmap Tie-In:

- NFTs act as governance tokens for future DAO voting on game features.

6. Stake 2.0: The Evolution of Decentralized Ownership

Exclusive Early Access & VIP City Launch

Upon the full distribution of the initial 10 million QPT, the Quépti Multiverse will officially debut, granting exclusive early access to loyal token holders.

- VIP City Privileges:
 - A premium virtual district will be unlocked, reserved solely for early stakeholders who participated in the project's foundational phase.
 - Virtual real estate (in the form of limited-edition NFTs) will be claimable, reinforcing prestige and long-term engagement.

Stake 2.0: A Revolutionary Reward Mechanism

- The next phase of staking introduces a paradigm shift—replacing QPT distributions with Treasure Chests (Baus), which unlock community-driven NFT collections.
- Decentralized Creation & Royalties:
- Annual NFT Collections: Each year, the community will collaboratively design and vote on exclusive in-game NFTs, minted in strictly limited quantities.
- Creator Royalties: Contributors earn lifetime royalties (e.g., 5–10%) from every secondary market sale of their NFTs, fostering a self-sustaining creative economy.

Scarcity-Driven Ecosystem

To preserve value and incentivize peer-to-peer commerce:

- Zero Centralized Marketplace:
 - All NFTs will be non-replicable and obtainable only through:
 - In-game discovery (via quests, events, or achievements).
 - Player-to-player (P2P) trading on decentralized platforms.
 - No "Quépti-owned store" will exist—ensuring true digital asset ownership.
- Annual NFT Drops:
 - One annual release per collection, with fixed, immutable supply (e.g., 10,000 NFTs per year).
 - Staker Discounts: QPT stakers receive priority access + tiered discounts (e.g., 15–30%) during event-based sales.

Economic Impact & Long-Term Vision

- Player-Driven Rarity: Scarcity is algorithmically enforced, with no re-mints or inflation, creating a self-appreciating asset economy.
- Governance Integration: NFT holders gain voting rights to shape future game features, blending play-to-earn with decentralized governance.

Villager's Chest

This Chest is level 1, acquired after the second month of coin lock-up on the staking 2.0 platform, with the chance to receive a card upon opening.

Warrior's Chest

This Chest is level 2, acquired after the fourth month of coin lock-up on the staking 2.0 platform, with the chance to receive two cards upon opening.

Craftsman's Chest

This Chest is level 3, acquired after the sixth month of coin lock-up on the staking 2.0 platform, with the chance to receive two cards upon opening.

General's Chest

This Chest is level 4, acquired after the eighth month of coin lock-up on the staking 2.0 platform, with the chance to receive three cards upon opening.

Prince's Chest

This Chest is level 5, acquired after the tenth month of coin lock-up on the staking 2.0 platform, with the chance to receive three cards upon opening.

Queen's Chest

This Chest is level 6, acquired after the twelfth month of coin lock-up on the staking 2.0 platform, with the chance to receive four cards upon opening.

King's Chest

This Chest is level 7, acquired after the twelfth month of coin lock-up on the staking 2.0 platform, with the chance to receive a SUPREME card upon opening.

Event Chest

This Chest is level 8, created annually by the community. It is sold 30 days after its official launch in a limited supply, with the purpose of rewarding those elected to create the game's new NFTs. Each year, a new collection is released. In the first year, the project's founding team initiated the creation process, but in the following years, this task will be exclusively handled by the community—marking the beginning of power decentralization. This chest guarantees the user 6 cards, one from each rarity level.

Quépticoïn

A MEMORABLE INVITATION

Dear Investors,

We are thrilled to introduce Queptico (QPT), an innovative project that merges DeFi (Decentralized Finance) with a gamified Metaverse, offering real utility and exceptional growth potential. The presale is now live, with tokens priced at just \$0.05 each—a rare opportunity for investors looking to get in early on a groundbreaking ecosystem.

Why Invest in Queptico (QPT)?

1. Advanced DeFi Technology

- Automated compound interest system, enabling sustainable passive income.
- Audited smart contracts ensuring secure and transparent transactions.

2. Gamified Metaverse – A Unique Experience

- Inspired by The Sims and Pokémon GO, our Metaverse combines immersive virtual worlds with real-world interaction, allowing users to:
 - Create and monetize their virtual spaces.
 - Explore and collect digital assets (NFTs) with utility in the QPT ecosystem.
 - Complete quests and compete for token rewards.

3. Presale with Low Entry & High Growth Potential

- Current price: \$0.05 per QPT—a strategic entry before exchange listings.
- Limited-time bonuses for early investors (special conditions apply).

4. Strong Roadmap & Strategic Partnerships

- Phase 1: Presale launch and core DeFi development.
- Phase 2: Metaverse integration and public beta release.
- Phase 3: Major exchange listings and ecosystem expansion.

Don't Miss Out!

Quepticoïn (QPT) is not just another cryptocurrency—it's a multifunctional project with real-world applications in DeFi and digital entertainment. Early investors will benefit from:

- Accelerated growth post-launch.
- Active participation in an innovative Metaverse.
- Exponential returns through compound interest and gamification.

Join Us on This Journey!

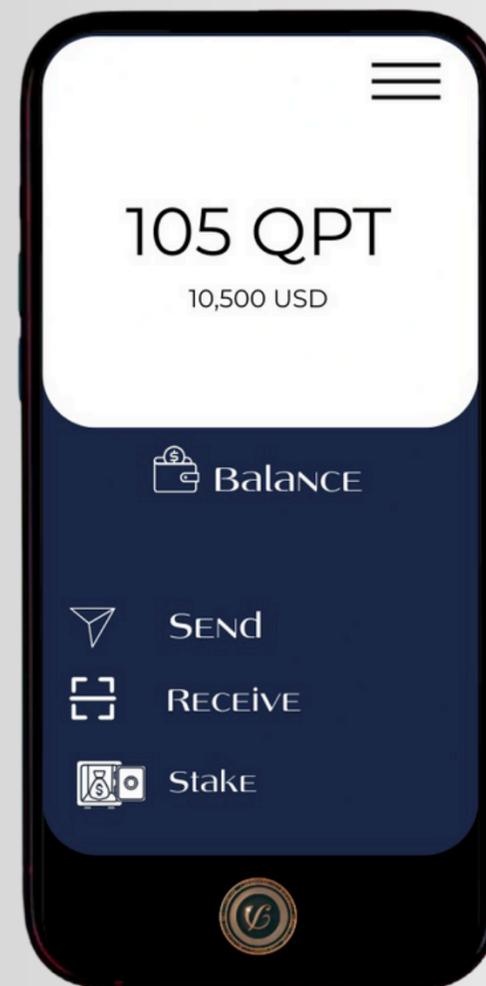

We believe in the power of Quepticoïn (QPT) to revolutionize the crypto market, and your early investment is key to its success.

Quépticoin

ELEGANCE and sophistication

Enough is enough. The crypto market is flooded with low-value meme coins—projects with 1 billion+ supplies, hyperinflationary mechanics, and empty promises that you'll "get rich quick" if their token somehow hits \$1. Let's be honest: That's a fantasy.

Most of these coins are designed to dump on retail investors, leaving them holding worthless bags while early insiders cash out. They have no real utility, no sustainable tokenomics, and no long-term vision.

Queptico (QPT) Is Different – Here's Why

We're not here to play games. QPT is built for real-world adoption, combining DeFi-powered passive income with an engaging, gamified Metaverse—where every token has actual use and value.

✓ Controlled Supply, Sustainable Growth

- No absurd, inflationary billions. QPT's supply is strategically structured to prevent dilution and ensure long-term appreciation.

✓ Real Utility – Not Just Hype

- Earn compound interest automatically through our DeFi protocol.
- Play, trade, and monetize in a Sims + Pokémon GO-inspired Metaverse.

✓ Transparent & Investor-Focused

- No rug pulls, no shady dev wallets. Our smart contracts are audited, and our team is doxxed & committed.

This Is Your Chance to Invest in Something That Actually Has a Future

While others chase pump-and-dump schemes, QPT offers a legitimate path to growth—backed by technology, adoption, and a clear roadmap.

 Presale Price: \$0.05 per QPT (Limited-Time Opportunity)

QUÉPTICOIN
